

TRANSFER Slovensko, Ltd.

Presentation of the WP1 Research and Identification of Best Practices

Activity 1.1

- TRANSFER selected 6 health care provider 5 public nad 1 private
- we selected 35 professional health care carers
- we selected 10 patients and their relatives

Results

- online database of 35 professional health carers
- involving of 10 patient with their reltives
- involvement of 6 health care providers

We involved in Slovakia more that 1 care provider because our care providers are too small to give 30 professional health carers. Only private care provider Senioville Jablonove give fot the project 18 health care carers

TRANSFER Slovensko, Ltd.

Presentation of the WP1 Research and Identification of Best Practices

Activity 1.2

- TRANSFER collected review of 50 National Publications on health care assistance and other care activities at home
- Review of 50 National Publication is in English and the Slovak languages

Our National Publication database is focusing on books about nursing and care topics for students, health workers, care assistants, on articles in special magazines and on the web sites about care and nursing problems, problem is with this review for 300 words, because some of this publications are only short newspapers article, web pages, articles in magazines, etc. and this kind of publications is not possible to write so big comment.
